MEngSc in Biopharmaceutical Engineering

MEngSc (NFQ Level 9)

Scholarships Available | Sustainable Development Goals

This course is available through the following application route(s)

Direct entry to

T070 MEngSc in Biopharmaceutical Engineering*(MEngSc)* 1 Year

Duration:	1 Year	**Level:**	Graduate Taught
Attendance:	Full Time	**Award:**	Master of Engineering Science
Delivery:	On Campus	**Next Intake:**	September
NFQ Level:	9 (90 credits)		

Curricular information is subject to change.

APPLY NOW

Pharmaceutical and Biopharmaceutical manufacturing are key sectors in the Irish economy generating over 50 per cent of GDP. This sector has seen continued and sustained success with a number of high-profile investments in recent years providing excellent job opportunities for graduates. The programme and its academic faculty are closely linked with the National Institute for Bioprocessing Research and Training (NIBRT), which is a global centre of excellence for training and research in bioprocessing.

This MEngSc in Biopharmaceutical Engineering programme provides substantial coverage of scientific, technical, management and regulatory issues associated with this industry. This programme offers an internationally recognised high quality flexible curriculum, which follows the latest developments in science and technology. This programme is suitable for Science and Engineering graduates wishing to obtain a qualification which is highly relevant to the biopharmaceutical industry.
